EDUCATION

Madhav Institute of Technology & Science, Gwalior, Madhya Pradesh — **November 2022 - July 2026**
Bachelor of Technology in Computer Science & Design — CGPA: 7.31/10

Govt Excellence H.S School Ashoknagar, Madhya Pradesh — **July 2021 - April 2022**
Higher Secondary School — Percentage: 73.4%

EXPERIENCE

Full Stack Developer Intern
DND Consultancy — **December 2025 - April 2026 | Remote**

- Developed the complete frontend of **UltraHustle**, a freelancer marketplace platform, using **React.js**, building **15+ responsive screens** with reusable component architecture and centralized state management for seamless desktop and mobile navigation.
- Engineered **8+ RESTful APIs** using **Node.js, Express.js, and MongoDB**, implementing **Mongoose** schema validation, pagination, and optimized database queries to support scalable frontend data integration.
- Built **6+ core modules** for the company website and internal admin dashboard using the **MERN stack**, incorporating **Role-Based Access Control (RBAC)** and dynamic data tables to automate internal team workflows.
- Executed end-to-end **API testing** via **Postman**, resolved **15+ UI and backend bugs**, and improved application load times through React code-splitting, lazy loading, and **Git/GitHub** pull-request workflows.

PROJECTS

AIGenie - AI SaaS Platform — **August 2025 - September 2025**

- Built a modern, responsive SaaS interface using **React.js** and **TailwindCSS**, designing modular and reusable UI components with protected client-side routing across all dashboard views.
- Integrated **Clerk Authentication** to handle secure multi-factor sign-in, **OAuth**, and session management, enforcing middleware route protection across both client views and backend API endpoints.
- Integrated **Google Gemini LLM APIs** to power **3+ automated content-generation workflows**, implementing structured prompt handling, asynchronous response streaming, and error fallback states.
- Architected a relational **PostgreSQL** database schema with **10+ normalized entities** to support multi-tenant user workspaces, generation history tracking, and high-integrity CRUD operations.

Ridemate - Ride Booking Website — **January 2025 - March 2025**

- Built a full-stack ride-hailing web application using the **MERN stack**, architecting **3 distinct role-based user flows** for riders, drivers, and real-time booking management with **JWT authentication**.
- Implemented bidirectional event-driven communication using **Socket.io** for live driver location tracking and instant ride-status synchronization, eliminating the latency and server overhead of traditional HTTP polling.
- Designed interactive booking and trip-lifecycle interfaces in **React.js**, handling asynchronous ride requests, fare estimation, and live trip-state transitions across mobile and desktop viewports.

SKILLS

Programming Languages & DSA: C++, Java, Python, Data Structures and Algorithms
Frameworks/Libraries: React.js, Node.js, Express.js, Socket.io, Mongoose, TailwindCSS
Databases: MySQL, MongoDB, PostgreSQL
Web Technologies: HTML, CSS, JavaScript, TypeScript
Tools: Docker, Kubernetes, Postman, Vercel, Render
Version Control: Git, GitHub
Soft Skills: Communication, Problem Solving, Collaboration

CERTIFICATIONS

Getting Started with Competitive Programming **- NPTEL**
Ethical Hacking **- NPTEL**
The Complete Full Stack Development **- Udemy**
Python For Data Science **- NPTEL**
